Recommended Parameters

Parameter	Value	Units	Comments
Flow Rates	>7,500	Nm3/hr	Higher flow rates preferable
Pressure Ratio	>1.2:1	-	Upstream-to-Downstream pressure ratio. Higher ratio is preferable
Absolute Pressure Drop	>7	Bar-g	In most applications, Pressure Ratio will be a more important consideration
Inlet Temperature	~25	°C	Inlet T dependent on target pressure reduction and gas composition
Outlet Temperature	Varies	°C	Usually specified by operator. Constrained by avoidance of icing and/or liquid drop-out after gas expansion
Gas Composition	-	-	Sales Gas is ideal. No sour gas or corrosive components
